

NORTHERN LIGHTS & ICELANDIC WILDERNESS

A mythical kingdom ruled by elves and fire spewing volcanoes, Iceland is one place where immense sky with countless stars gives a new meaning to the “infinite”. A place where the warmth of people contrasts cold arctic glaciers and long endless roads are dotted with tiny villages. Announcing unique *trip-of-a-lifetime* to explore this larger-than-life landscape and its hidden treasures. And all along *Maps & Stories* ensures that you get front row seats to the most spectacular show in the universe – *the dance of the auroras*.

WHAT ARE NORTHERN LIGHTS

Northern Lights, or Aurora Borealis is a vivid & shifting display of colours seen on clear dark nights from select places close to the arctic circle. They are caused by collision of high energy charged particles from the Sun with gases in the Earth's atmosphere. These electrical and magnetic forces are constantly shifting, making the auroras dance

Maps & Stories designs personalized vacations with experiential themes and off-the-beaten-track itineraries.
